## PROJECT NEWS

Many new projects are on the **designwell** horizon such as the St. Paul's Lutheran homes in Hahndorf and Christie Downs Primary School. Christie Downs Primary School is a special project which requires careful integration of the school's special needs children with mainstream children. **Designwell** have engaged with the children through interactive consultation to generate ideas for their new Nature Play space.

**Designwell** are proud to announce the completion of the Westminster Early Learning Centre. The project saw a huge focus on Nature Play. The kids are loving their rocky mound, slide, tunnel and dry creek bed with hand pump.

## NEWS

**Designwell** have been selected to work alongside Concordia College Early Learning Centre (formerly St. Johns Early Learning Centre) to represent South Australia in the AILA 'My Park Rules' competition. Concordia College ELC aims to develop a nature play orientated space in conjunction with the Reggio Emilia philosophy, both of which **designwell** have successfully executed on many occasions. Watch this space!

## EVENTS

November saw the Seven Senses Street Day come to Bank St. in Adelaide. Working with Adelaide City council, we created multi-sensory experience extending from one end of the parklets to the other.

## WEBSITE

Over the Christmas period the **designwell** website has received a complete revamp! The new website features up-to-date details on our completed projects across various categories which can be easily viewed from the home page.

Check out of these new changes at [www.designwell.net.au](http://www.designwell.net.au)

## SHARING KNOWLEDGE

Tara will soon have her hands full when she is scheduled to speak and teach at the International Environments for Aging conference in Austin, Texas in April this year.

Tara has also been requested by Singapore Botanic Gardens to teach a two day interactive course on Horticulture Therapy and Therapeutic Design in May.
